AGRICULTURE

1. Agriculture innovation systems in Asia: Towards inclusive rural development / edited by Lakhwinder Singh and Anita Gill.. - London: Routledge, 2019. xxiv,339; South Asia edition.

ISBN : 978-0-367-36429-8.

338.16095 Si6A R0 51154

Book Description: This book looks at agricultural systems and rural economies in Asia through the prism of alternative innovation systems, alternative public policy and institutional changes.

The massive shifts within the agricultural economy in Asia, geared towards increasing production, has had a direct effect on the livelihood of a large mass of people in rural societies, causing financial and social distress. This book explores a wide range of solutions, such as the role of education, improving technical skills and human capital, along with interactive learning in R&D, harnessing ICTs and institutional innovations, to see how these problems can be alleviated. The volume looks at how these methods can help formulate alternative ways to build sustainable and inclusive agricultural societies, ensure food security,

sustainable growth and agricultural productivity.

This book, rich in theoretical and empirical matter, will be useful for academics and researchers interested in agricultural innovation, development studies and agricultural economics. It will also be of interest to policymakers and think tanks working towards inclusive social development and sustainability in Asia and the Indian subcontinent.

ECONOMIC DEVELOPMENT

2. International Monetary Fund

World economic outlook 2019: Global manufacturing downturn, rising trade barriers / International Monetary Fund.. - Washington: IMF, 2019. xvii,188; October.

ISBN : 978-1-51350-821-4.

330.9 In8W Q9 I1789

Book Description: Global growth is forecast at 3.0 percent for 2019, its lowest level since 2008–09 and a 0.3 percentage point downgrade from the April 2019 World Economic Outlook. Growth is projected to pick up to 3.4 percent in 2020 (a 0.2 percentage point downward revision compared with April), reflecting primarily a projected improvement in economic performance in a number of emerging markets in Latin America, the Middle East, and emerging and developing Europe that are under macroeconomic strain. Yet, with uncertainty about prospects for several of these countries, a projected slowdown in China and the United States, and prominent downside risks, a much more subdued pace of global activity could well materialize. To forestall such an outcome, policies should decisively aim at defusing trade tensions, reinvigorating multilateral cooperation, and providing timely support to economic activity where needed. To strengthen resilience, policymakers should address financial vulnerabilities that pose risks to growth in the medium term. Making growth more inclusive, which is essential for securing better economic prospects for all, should remain an overarching goal.

3. International Monetary Fund

World economic outlook 2019: Growth slowdown, precarious recovery / International Monetary Fund.. - Washington: IMF, 2019. xvi,198; April.

**ISBN : 978-1-48439-748-0.
330.9 In8W Q9 I1788**

Book Description: After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China’s growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more

accommodative monetary policy stance and markets became more optimistic about a US–China trade deal, but they remain slightly more restrictive than in the fall.

ECONOMIC GROWTH

4. Beyond covid's shadow: Mapping India's economic resurgence / edited by Sanjaya Baru.. - New Delhi: Rupa Publications, xiv,321; ISBN : 978-93-90356-89-8. 338.954 B28B R1 51166

Book Description: The Indian economy was already dealing with the challenge of a growth slowdown when Pandemic struck. To contain the spread of the pandemic, the Indian government imposed a comprehensive lockdown of all activity in March 2020. While the rest of the world also imposed a range of restrictions, India’s overnight lockdown was the severest. The drastic contraction in economic activity has

meant that in Fiscal year 2020–21, India may end up with a negative rate of growth of up to -10 per cent. What has been the impact of the pandemic on the economy and how can the momentum of growth be restored? In this volume, Sanjaya Baru brings together essays by several eminent and highly regarded contributors like C. Rangarajan, Subramanian Swamy, bibek Debroy, Meghnad Desai, Amitabh Kant, Indira Rajaraman, Rama bijapurkar, Omkar Swami and many more, looking at various dimensions of the pandemic economic and social impact and of the macroeconomic policy response required for an atmanirbhar Bharat.

ECONOMIC SURVEY

5. India, Ministry of Finance

Economic survey 2020-21 / India, Ministry of Finance.. - New Delhi: Ministry of Finance, 2021. V.1: xv,334; V.2: Misc.; 2Vs. 330.954 In2E R1.1-2 DS51155 - DS51156

Book Description: Economic survey 2020-21 is an ardent tribute to the immortal human spirit of grit and compassion encapsulated by the tireless battle against the pandemic by our frontline COVID-19 warriors. In the midst of the most unfathomable global health emergency experienced in modern history, the resolve of each Indian helped find its way from the darkness of 'lives vs livelihoods' to the glow of '#SavingLives&Livelihoods'. The foresight of our collective vision to battle this pandemic became evident when policy insights the implementation at the centre, state and local level converged to initiate a V-shaped economic recovery.

Through this year, as India bravely fought the global pandemic, it charted its own unique trajectory-showing remarkable resilience, be it fighting the virus or ensuring economic recovery. This resilience is driven by the strength of our systems that enforced the graded public health measures, ramped up the health response, ensured free food grains to 80 crore people and gave momentum to the economic recovery. India derived its strength from the support of 137 crore Indians who practised social distancing, wore masks and industriously contributed to the fight.

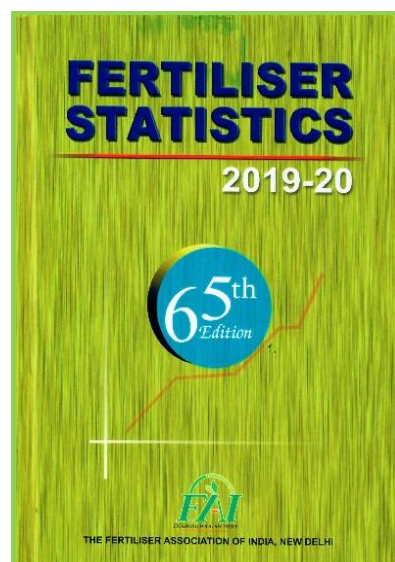

Clarity of objectives is imperative in policymaking as the various macro-economic policy choices always present inherent trade-offs. The survey makes the case for continued focus on economic growth as the most important objective for India at its stage of development.
