CAPITAL

1. Marx, Karl

Capital (Das Kapital) / by Karl Marx.. - New Delhi: Prakash Books India Pvt. Ltd., 2018. 1392; Includes Vol I,II and III. ISBN : 978-81-7599-414-0. 335.4 M36C Q8 51320

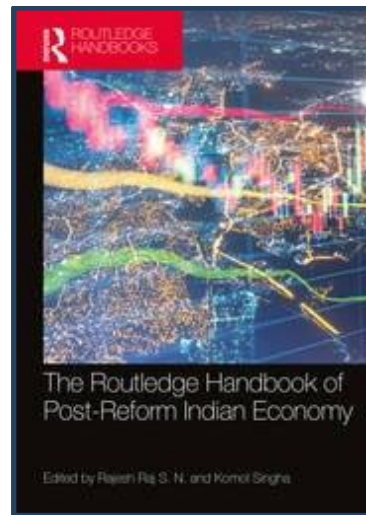

Book Description: “Money is the alienated essence of man’s labour and life; and this alien essence dominates him as he worships it.” From the concepts of commodities and money, surplus-value of labour, the accumulation of capital, and its process of circulation, to the conversion of surplus value into profit and transformation of surplus-profit into ground rent, Karl Marx’s Capital presents his theory of the capitalist system. Regarded as a significant work of the modern economic thought, this magnum opus is a comprehensive critique on the political economy. This edition contains all the three volumes of the Capital. Out of the three, only the first volume was published by Marx during his lifetime.

ECONOMIC REFORM

2. Routledge handbook of post reform Indian Economy / edited by Rajesh Raj S.N. and Komal Singha.. - London: Routledge, xxix,562; (Routledge handbooks). ISBN : 978-0-367-42870-9. 330.954 R13R R2 51350

Book Description: This handbook presents a comprehensive study of the post-reform Indian economy, three decades after the economic liberalization started in the early 1990s.

It studies the broad range of changes that were introduced in the reforms era, assessing their impact on sectors like manufacturing, agriculture, banking and finance, among others. It also assesses the performance of these sectors amid globalization and the socio-economic shifts in the country. The volume evaluates the contribution of the reforms to social transformation, social inclusion, sustainability and human development, and deliberates on the gains, blind spots and limitations. With contributions from scholars across the country, case studies and comparative analyses that draw on data analysis, econometric evidence and

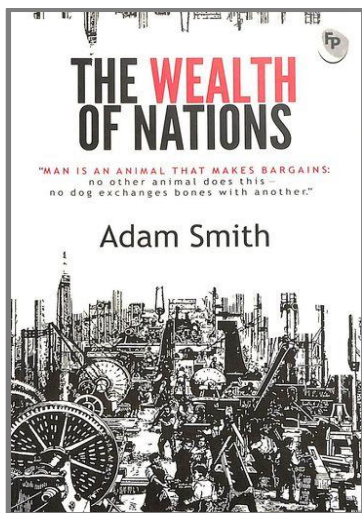

historical sensibility, this is an authoritative volume on the reforms of the 1990s and their impact on the Indian economy and people.

ECONOMICS

3. Smith, Adam

Wealth of nations / by Adam Smith.. - New Delhi: Finger Print Classics, 2018. 1143; ISBN : 978-93-8777-946-4. 330.153 Sm5W Q8 51326

Book Description: Right from examining the division of labour, the origin and use of money, and the division of stock, to the rise and progress of cities and towns after the fall of the Roman Empire, the systems of political economy, and the taxes on various private revenues, Adam Smith's *The Wealth of Nations* provides an extensive assessment of the creation of a nation's wealth. Laying the foundation of classical political economy, this magnum opus is considered one of the best non-fiction books of all time. More than two centuries after its first publication in 1776, *The Wealth of Nations* continues to remain as influential as ever.

EDUCATION

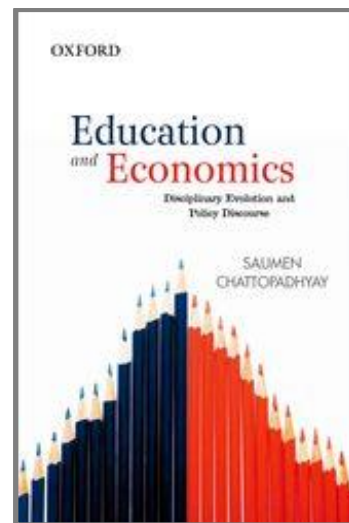

4. Chattopadhyay, Saumen

Education and economics: Disciplinary evolution and policy discourse / by Saumen Chattopadhyay. - New Delhi: OUP, 2012. xviii,334;

ISBN : 978-0-19-808225-5.

338.47370954 C39E Q2

51328

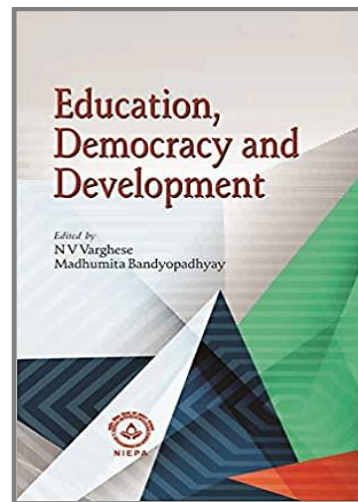

Book Description: This book explores various conceptualizations of education in economic theory and how this has influenced policymaking in education. Despite the relative dominance of human capital theory in economics of education as a sub-discipline of economics and neo-liberalism as an overarching framework in policy discourse, the alternative perspectives to understand and appreciate the role of education in socio-economic development deserve immediate attention. The book deconstructs the interface between economic theory and education in order to unravel the various ways in which education plays a role in socio-economic development to drive home the point that straightforward application of economic theory to study education and the education market while designing education policies is fraught with

many pitfalls. While attaining efficiency in resource use and competitiveness are the dominant concerns for policymakers in the emerging global knowledge economy, inclusive and socially cohesive growth also deserves prime attention from policymakers. In particular, it is argued that an absence of a well-defined production function for an academic institution not only discredits the credibility of neo-liberal reform measures, but also justifies why reliance on the market as the guiding principle and the private sector as the dominant service provider may have serious adverse implications for education and the society. After all, classification of education and knowledge as public goods or otherwise and, therefore, their contributions in the economy and society are essentially policy constructs. The book ends with a discussion of challenges facing the Indian education system and policies being mooted.

5. Education, democracy and development: Equity and inclusion / edited by N.V. Varghese and Madhumita Bandyopadhyay.. - Delhi: Shipra Publications, 2020. xv,311; ISBN : 978-93-88691-37-6. 370.115 V42E R0 51319

Book Description: It is commonly believed that democratic regimes follow egalitarian policies and they are less tolerant to inequalities in any form. The global experience in the past quarter of a century has shown a contrary trend of widening inequalities while increasing number of countries are brought under democratic regimes. Education is a source of economic growth and it can also be a source of inequalities if provisions for pursuing education are not equally distributed. Education is a fundamental right and its universal provision is a national priority and a social imperative. There is a need for countries to strictly adhere to progressive policies to ensure equality of educational opportunity to progress towards an inclusive social development agenda. The book provides an insight into the issues related to the role of education in promoting democracy and sustaining egalitarian principles to move towards creating an inclusive society.

POVERTY

6. *Banerjee, Abhijit V.*

Poor economics: Rethinking poverty & the ways to end it / by Abhijit V. Banerjee and Esther Duflo.. - Noida: Random House Publishers India Pvt. Ltd., 2011. xv,442; ISBN : 978-81-8400-280-5.

339.46 B22P Q1 51329

Book Description: Imagine you have a few billion dollars and want to spend it on the poor. How do you go about it? Billions of government dollars and thousands of charitable organizations and NGOs, are dedicated to helping the world's poor. But much of their work is based on assumptions about the poor and the world that are untested generalizations at best, harmful misperceptions at worst. Abhijit V. Banerjee and Esther Duflo have pioneered the use of randomized control trials (RCTs) in development economics through their award-winning Poverty Action Lab. They argue that by using RCTs and more generally, by paying careful attention to the evidence, it is possible to make accurate and often startling assessments on what really impacts the poor and what doesn't. Revelatory and impassioned, *Poor Economics* is a pathbreaking book that will help you to understand the real causes of poverty and how to end it.

STATISTICAL MATHEMATICS

7. *Guo, Shenyang*

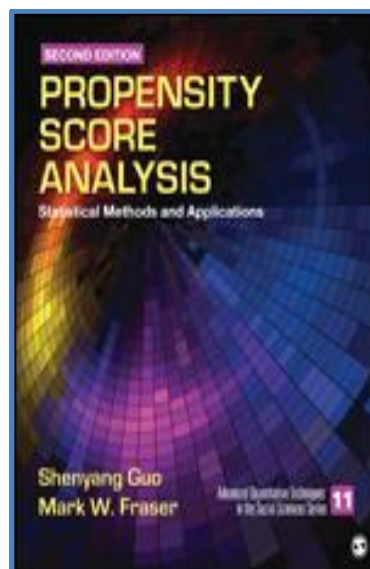

Propensity score analysis: Statistical methods and applications / by Shenyang Guo and Mark W. Fraser.. - ed. 2. - California: Sage Publications, 2015.

xxiv,421;

(Advanced quantitative techniques in the social sciences series 11).

ISBN : 978-1-4522-3500-4.

519.53 G95P Q5 51311

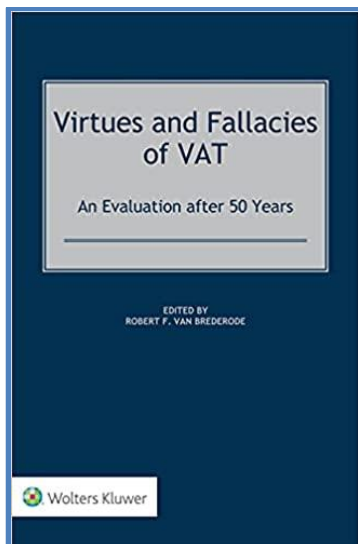

Book Description: Fully updated to reflect the most recent changes in the field, the Second Edition of *Propensity Score Analysis* provides an accessible, systematic review of the origins, history, and statistical foundations of propensity score analysis, illustrating how it can be used for solving evaluation and causal-inference problems. With a strong focus on practical applications, the authors explore various strategies for employing PSA, discuss the use of PSA with alternative types of data, and delineate the limitations of PSA under a variety of constraints. Unlike existing textbooks on program evaluation and causal

inference, this book delves into statistical concepts, formulas, and models within the context of a robust and engaging focus on application.

TAXATION

8. Virtues and fallacies of VAT: An evaluation after 50 years / edited by Robert F. van Brederode.. - Netherlands: Kluwer Law International, 2021. xliii,678; ISBN : 978-94-035-2423-8. 336.2712 V25V R1 51312

Book Description: **Virtues and Fallacies of VAT** centers on evaluating the use of value-added tax (VAT) from a global policy perspective after over 50 years of experience with its intricacies. VAT is a mainstay of revenue systems in more than 160 countries. Because consumption is a more stable revenue base than other tax bases, VAT is less distorting and hence more likely to encourage investment, savings, optimum labor supply decisions, and growth.

Understanding the strengths and weaknesses of VAT is important for policymakers and their advisors when contemplating introducing the tax in a country or evaluating how to improve an existing VAT system. This book offers authoritative perspectives on VAT's full spectrum from its signal successes to the subtle ways in

which its application can undermine revenue performance and economic neutrality.
